Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 21, 45 – 96 drawn to server pools, classified in class 709, subclass 226.
- II. Claims 22 - 44, drawn to agent pools and work distributors, classified in class 379, subclass 265.

The inventions are distinct, each from the other because of the following reasons:

Inventions of determining if a server should be assigned to a server pool and determining if an agent should be assigned to an agent pool are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions involve a method for two totally different ideas. In the first case, applicants are trying to determine if a server should be assigned to a server pool in a processing facility, while in the second case, applicants are determining whether an agent should be assigned to an agent pool in a call center. The drawings do not show an agent assignor and a server assignor working together. Obviously, assigning agents to an agent pool has a different effect than assigning servers to a server pool.
